

URPP Financial Market Regulation

51st Forum Financial Market Regulation of 8 May 2019

The future of data-driven finance

China leads the world in data-driven finance. Europe's financial services and data protection regulatory reforms have unintentionally driven the use of regulatory technologies (RegTech) by intermediaries, supervisors and regulators, thereby laying the foundations for the digital transformation of both EU financial services and financial regulation. The experiences of Europe in this process provide insights for other economies in developing regulatory approaches to the intersection of data, finance and technology. The presentation will give a general overview of the developments of data-driven finance in recent years, with particular emphasis on the experiences of China and Europe.

Agenda

- 12:15 p.m. [Welcome](#)
