

**URPP Financial Market Regulation**

**55th Forum Financial Market Regulation of 19 November 2019**

**Quantifying Macroeconomic Tradeoffs in Europe**

At the time of the creation of the euro, it was well understood that increased labor market flexibility and more integrated markets would be required to substitute for independent monetary policy. Despite concerns about whether the preconditions were in place for a successful monetary union, member states moved ahead with the adoption of the euro. This talk will examine the opportunity cost of the euro given economic conditions in Europe. The degree of labor mobility, the persistence of unemployment, the volume and direction of trade and the magnitude of economic fluctuations in Europe will be contrasted with the United States, a similarly large region with a shared currency.

**Agenda**

- 12:15 p.m. [Welcome](#)  
Prof. Dr. Mathias Hoffmann
- 12:20 p.m. [Presentation](#)  
Prof. Linda L. Tesar (University of Michigan; Inge Strauch Visiting Professor UZH)
